

Solayman El Mouden

Full stack Developer

Morocco | +212699361992 | elmouden.syn@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Software Engineer student with a background in systems programming (C/C++) and fullstack development. I build and ship complete projects — from low-level engines to Docker-deployed web applications.

EDUCATION

1337 School – UMGP

Software Engineering Formation

- Project-based program focused on systems, algorithms, and peer learning inspired by Ecole 42's model.

Faculty of Sciences and Technology (FST)

Engineering of Networks and Information Systems

- Studied computer networks, systems, databases, and AI fundamentals with hands-on projects and software design modules.

Preparatory Classes for the Grandes Ecoles (CPGE)

Mathematics and Physics Track

- Intensive training in advanced mathematics, physics, and engineering sciences, developing strong analytical and problem-solving abilities.

PROJECTS

Inception (42 Project) | Docker, Nginx, MariaDB, WordPress

- Created a multi-container Docker infrastructure hosting a WordPress site with Nginx as reverse proxy
- Configured secure MariaDB backend with proper networking and volume management.

freelancer-crm (42 Project) | NestJS, React, PostgreSQL, Docker, Prometheus/Grafana

- Built a full-stack multi-tenant CRM with JWT auth and an AI chatbot powered by DeepSeek API with intent detection.
- Engineered DevOps infrastructure: multi-stage Dockerfiles, Nginx + TLS, automated DB backups, and a full Prometheus/Grafana monitoring stack with custom alert rules

CV LaTeX Builder | Python (Flask), JavaScript, HTML/CSS, LaTeX

- Built a web app with structured profile forms, live preview, and one-click PDF export.
- Integrated Jinja2 + XelaTeX pipeline with validation and Docker-ready deployment

Synced Notes App | JavaScript, HTML/CSS, Cloud APIs

- Built a lightweight note-taking app with GitHub and Google Drive sync capabilities.
- Integrated OAuth 2.0 and REST APIs for version-controlled and cloud-based storage
- Designed responsive UI with zero hosting requirements using client-side architecture.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: Django, React, Docker, Git, Nginx, Prometheus, Grafana

Core Concepts: System Programming, LLM API Integration, Database, Container Orchestration

Spoken Languages: Arabic, French, English
